

ETHICS AND INVESTMENT MANAGEMENT

TRUST

Trust is a belief that those people on whom we depend, either by choice or circumstance, will meet the expectations we have placed on them. Trust does not just happen; a client must make a conscious decision to trust an investment manager.

FIDUCIARY DUTY

A person who holds a position of trust often has a duty to the individual who has placed trust in that person. This applies to the care of client assets.

CODE OF ETHICS

A code that ensures an investment manager's fiduciary duty is performed and that all clients and investors are treated fairly and appropriately.

QVIM instills a culture where leadership is serious about ethics, compliance and internal audit. Our corporate culture values and rewards ethical behaviour.
